SKILLS

- HTML
- CSS
- JavaScript
- React
- Next.js
- Tailwind CSS
- Ant Design

- Node.js
- TypeScript
- Strapi
- Contentful
- Swagger
- Postman
- Git

- Digital Ocean
- Vercel
- Figma
- Cursor
- Prompt Engineering
- Leadership
- Teamwork

EXPERIENCE

Frontend Developer at It Jobs Opportunities (2025)

Built a recruiter platform with an Applicant Tracking System (ATS) and a job posting website using React, TypeScript, Tailwind, and Ant Design. Integrated APIs with Swagger and led the frontend team, overseeing code quality, architecture, Git workflows, pull requests, and merges to ensure smooth project delivery.

Frontend Contributor at Outlier via Braintrust (2024–2025)

Completed contract assignments as a frontend developer, using React to support projects that improve generative AI systems. Tasks included building and reviewing UI components, testing AI-assisted code, and evaluating outputs to ensure functionality, accuracy, and user-friendly interfaces.

Frontend Developer at Two Dev (2023-2024)

Frontend development using React and Next.js, complemented by Node.js and TypeScript for backend. Employing Tailwind CSS for aesthetic and responsive design, and Strapi for content management. Digital Ocean is utilized for cloud hosting and Git for version control.

Content Migrator at Wondersauce (2022)

Responsible for transferring content within a migration project using the Contentful CMS.
